The PCL Packet Net is "on the air" most Mondays, at 8pm Eastern, 7pm Central, 6pm Mountain, 5pm Pacific. The net WON'T meet on the Mondays where these US Holidays occur during the week: Easter, Memorial Day, Independence Day, Labor Day, Thanksgiving Day, and Christmas/New Years Eve/Day. A message reminder will be sent out during these "off week nets".

Sometimes funny... sometimes serious... but always interesting. Friendly hams from all over gather here every week for a few chuckles, tips and tricks, and tall tales. Join us... you'll be glad you did. The net is in a roundtable format. Here are the available options to connect to The PCL Net. Note that due to very poor HF band conditions, please choose the telnet option below. If not, you likely will NEVER be able to get a clear connection to join the net.

! For AXIP Network Users: At any AXIP or BPQ32 Packet node, look for and connect to PACNET.

! For Outpost, Winpack and HyperTerminal Users: (Contact NS2B for your Username and Password.) Using telnet (iptelnet with the Outpost Packet Program is recommended), connect to ns2b.ddns.net Port 8010. When connected, enter PCL and press <ENTER>.

! For Internet users: (Contact NS2B for your Username and Password.) With your browser, connect to: http://ns2b.ddns.net:8080/Node/Terminal.html?pcl

If you see that you can't make the net that week, for whatever reason, please email either Bob at ns2b@arrl.net or ns2b@winlink.org -- or Daryl, N5VLZ, at n5vlz@arrl.net or n5vlz@winlink.org – and we'll acknowledge your callsign as an "early check-in" during the net. If you email your "comments" on how your week went to Daryl, N5VLZ, he'll note you as a courtesy check, and add your comments to the weekly scribe.

Daryl is usually Net Control and Scribe, with Bob (Sysop), as backup. We hope that you can join us on the net real soon!! 73 DE N5VLZ and NS2B.
